3G MOBILE HOTSPOT

Turn Your Palm Device into a Roving Hotspot

Access and share the Internet with your Palm webOS smartphone from anywhere within America’s largest and most reliable 3G network.

Now you can use your Palm® webOS™ smartphone as a wireless hotspot for up to five Wi-Fi–enabled devices. The Mobile Hotspot app from Verizon Wireless turns your phone into a personal Wi-Fi hotspot that follows you anywhere within the nation’s largest and most reliable 3G network.

A 3G data connection for up to five Wi-Fi–enabled devices.

Connect your Wi-Fi–enabled notebook/netbook, media player, or camera from anywhere within the Verizon Wireless Broadband Services Rate and Coverage Area.

Continue using your smartphone’s data features.

You can still send and receive email, browse the Web, and text message from your smartphone in addition to connecting up to five Wi-Fi–enabled devices.* And you can keep track of your data usage by simply going to verizonwireless.com and logging into your account, or by dialing #DATA from your Palm device.

Mobile Hotspot lets you:
• Create a Wi-Fi hotspot from anywhere within America’s largest and most reliable 3G network.
• Continue using on-device data features like email, text messaging, and Web browsing while connecting up to five Wi-Fi–enabled devices.*
• Connect to devices with the popular 802.11 b/g Wi-Fi protocol.

Turn your Palm device into a 3G Mobile Hotspot for up to five devices for a limited time.

Save $40/month*

* Activating the Palm Mobile Hotspot application requires you to subscribe to the Verizon Wireless 3G Mobile Hotspot feature, which includes a 5 GB monthly allowance. Any usage above the 5 GB monthly allowance will be billed at $0.05 per-MB. This feature is separate from your smartphone data feature. Please visit verizonwireless.com and log into your account, select add a feature, and add the 3G Mobile Hotspot feature. When your smartphone is connected using Mobile Hotspot, all data sent or received by your smartphone (including data sent or received by any Wi-Fi devices connected to it, or by your smartphone itself) will be billed according to your 3G Mobile Hotspot feature, and not according to your smartphone data feature.
How to get the Mobile Hotspot application and start using it on your Palm webOS smartphone.

To download the Mobile Hotspot application to your Palm webOS device, follow these steps:

**Step 1:** On your Palm webOS device, tap the **Launcher**.

**Step 2:** Tap the **Mobile Hotspot application** icon.

**Step 3:** Tap **OK**.

**Step 4:** Tap the **On/Off** switch.

**Step 5:** Enter your passphrase and tap **Done**.

**Step 6:** To turn on or disable Mobile Hotspot, tap the **On/Off** switch.

For more information on how Mobile Hotspot can keep you and your tools connected, visit [verizonwireless.com](http://verizonwireless.com).
