System Requirements:
- Operating System: Windows XP, Windows Vista, Windows 7, Windows 8, MAC OS 10.6 and later versions

Equipment:
- Personal Computer or MAC, USB Cable and handset

Hosting Website:
- [https://neofussvr.sslcs.cdngc.net](https://neofussvr.sslcs.cdngc.net)

Instructions:
- Software Repair Assistant Installation Instructions for Windows Users
- Software Repair Assistant Installation Instructions for MAC Users

Software Repair Assistant for Windows Users

1. Click **Repair Assistant** and select **Run Repair Assistant**.

2. Once the connection between the device and the PC become available, “Repair” button will be activated. Click the button to proceed.
3. The End User Tool will discover the data on device and give the user the option to select what data is to be backed up before starting the repair process. Click Backup button. This step is not mandatory.

4. The backup process will begin.

5. After backup is completed, the End User Tool will start downloading the software to move on to the repair process.
6. The Software Repair Tool will complete both the repair and restore process.

7. When restoring is complete, “Repair Complete” will be presented and the Close button will be activated. Select Close to continue and close the Software Repair Tool.

Software Repair Assistant for Mac Users

1. Click Repair Assistant and select Run Repair Assistant.

2. Once the connection between the device and the PC become available, “Repair” button will be activated. Click the button to proceed.
3. The End User Tool will discover the data on device and give the user the option to select what data is to be backed up before starting the repair process. Click **Backup** button. This step is not mandatory.

4. The backup process will begin.

5. After backup is completed, the End User Tool will start downloading the software to move on to the repair process.
6. The Software Repair Tool will complete both the repair and restore process.
