STeP 7: ACTIVATING YOUR DEVICE
If your device has not yet been activated, please follow the steps below:
1. Dial *228 from your home telephone and follow the instructions to program your Home Phone Connect.
2. You will hear a confirmation message once programming is complete.

Note: If porting your home telephone number to Home Phone Connect service, you will not be able to receive calls while the porting process is in progress.

STeP 8: MAKING CALLS

**IMPORTANT**
- Your Verizon Wireless Home Phone Connect requires 10-digit dialing. Please use the three-digit Area Code when dialing all local and long distance numbers.
- Your Verizon Wireless Home Phone Connect does not support rotary or pulse dialing phones.
- Before making a call, make sure at least one signal strength indicator ( ) is lit (or blinking).
- Place a call by entering the desired telephone number. The call will be dialed automatically.
- When your call is complete, hang up or return the phone to the receiver to ensure that you can receive calls.

CALL FORWARDING
Verizon Wireless Home Phone Connect allows customers to forward calls to another phone number, including your mobile phone or office number. Your home phone will not ring your phone unless the service is active. Only time applies to forwarded calls even if you send the call to a wireless telephone. When forwarding calls to phone numbers outside your local calling area, you may be billed for air time and roaming charges incurred. Additional per-minute charges may apply to all forwarded calls. This feature is also known as “Immediate Call Forwarding.”

To Activate Call Forwarding:
1. Dial *72.
2. Immediately enter the phone number where you want calls to be forwarded. (e.g., *72-212-123-4567)
3. You will hear a confirmation tone.
4. Hang up your home phone or return your phone receiver to its base.

STeP 9: MAKING CALLS

**IMPORTANT**
- Your Verizon Wireless Home Phone Connect requires 10-digit dialing. Please use the three-digit Area Code when dialing all local and long distance numbers.
- Your Verizon Wireless Home Phone Connect does not support rotary or pulse dialing phones.
- Before making a call, make sure at least one signal strength indicator ( ) is lit (or blinking).
- Place a call by entering the desired telephone number. The call will be dialed automatically.
- When your call is complete, hang up or return the phone to the receiver to ensure that you can receive calls.

STeP 10: UNDERSTANDING YOUR PHONE
1. Dial #72 to activate the call forwarding feature.
2. You will hear a confirmation message.
3. Hang up your home phone or return your phone receiver to its base.

Fax Machine Compatibility
Your Verizon Wireless Home Phone Connect does not support incoming or outgoing fax service.

Home Security Systems
Your Verizon Wireless Home Phone Connect may not be compatible with certain Home Security systems. Please check with your security system provider to confirm the compatibility requirements of your Home Security system.

911 Calls
Since the Home Phone Connect Adaptor is designed for an indoor environment, please be prepared to provide your location inside the premises if emergency personnel need to assist you. The GPS chipset embedded in this device will work best if the device is located near a window or other opening.

IMPORTANT
While the Home Phone Connect Adaptor has a backup battery, if the landline device requires external power to operate, service (including the ability to make and receive 911 calls) will not be available during a power outage.

Please refer to the User Manual for more details.
STEP 3: INSTALLING THE POWER ADAPTER
Under normal usage, the device relies on the external power adapter for its power supply. Insert one end of the power adapter into the DC input port, and plug the unit into an AC wall outlet.

NOTE: Backup battery power will only be used during power failure or if the external power adapter is not in use.

STEP 4: CONNECTING THE DEVICE TO A TELEPHONE
The device provides two telephone ports. The ports use the same telephone number. Plug one end of a telephone cable into a telephone port and the other end into the back of a home telephone or home telephone base unit.

Do not plug Home Phone Connect into your telephone wall jack. This configuration is not supported unless you have taken steps to disconnect the landline wires coming into your home.

NOTE: The telephone cable is not included.
