

Software Update for the SAMSUNG GALAXY S[®] 4.

Software Version: LRX22C.I545VRUGOF1

Verizon Wireless is pleased to announce a software update that will improve the performance of your Samsung Galaxy S4 smartphone.

Samsung Galaxy S 4

The Following Enhancements Have Been Made:

- Fixed an issue related to E-mail notifications not showing up in Status Bar
- Fixed an issue where in some cases the Alarm Clock does not start up
- Fixed an issue where in some rare cases when attempting to remove or add icons/widgets on any of the home screens the user is shown the Touch Wiz force close notification
- Fixed an issue related to Volume not staying to previously set value after the last software upgrade
- Fixed an issue where the device does not read out the body of the text message after software update
- Fixed an issue where in some cases the user is getting white squares on the lock screen instead of numbers
- Software change to prevent lockout of the device after the last software upgrade (only affects devices that have been Encrypted)
- Improvements to the Samsung Reactivation lock (lost or stolen device security)
- Android security patches
