

Android software update for your LG G3

Software Version: VS98524B

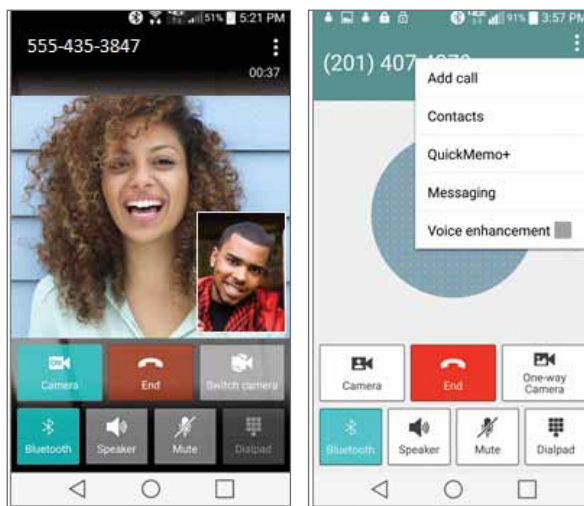

Verizon Wireless is pleased to announce a software update that will bring a variety of improvements to your LG G3 smartphone.

LG G3

Bluetooth

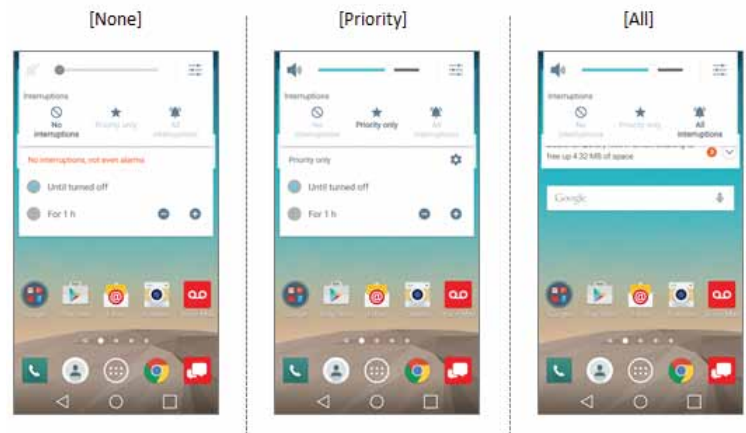

- Bluetooth button is added on the in-call screen to improve user experience.
- Add call button is now located under the Settings Menu.

For step-by-step instructions on how to perform the download, please visit www.vzw.com/lgg3update

Interruptions

- Provide Native “Interruptions” feature while maintaining LG UI component & label style.
- On-going notification is provided when the device is either set to No interruptions or Priority Only.
- Interruptions menu is added under the Quick settings
 - ‘None’ which will stop your device from sounding and all types of notifications with alarms.
 - ‘Priority’ which allows you to set what apps, and which calendar events and messages come through.
 - ‘All’ which allows all notifications to come through.

Advanced Calling

- After a user is provisioned for Advanced Calling, HD Voice and Video calling options will be provided under Advanced Calling setting.
- If the user is not subscribed for LTE Video Calling, Video calling option will be given as disabled.
