

Android 5.1 software update for your MOTO E™

Software Version: 23.11.17.surnia_verizon.verizon.en.US vzw

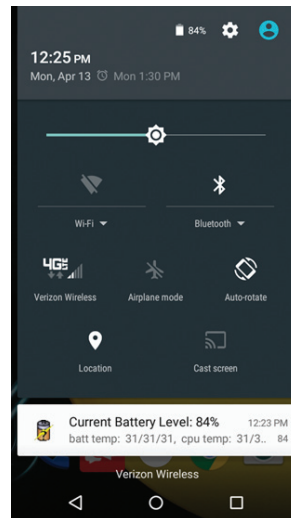

Verizon Wireless is pleased to announce a software update to Android 5.1 Lollipop. This version brings Android beyond smartphones and tablets, allowing access to apps and Android services on other connected screens like TVs, cars and wearables. The new material design offers complex animations and 3-D views, 64-bit ABI support and improved runtime.

MOTO E

UI Improvements

- Volume settings panel icons added to match icons in status bar.
- Quickly select different WiFi accessory or Bluetooth devices with the added pull-down controls.
- Minimum swipe distance increased to reduce accidental interactions if Ambient Display is enabled.

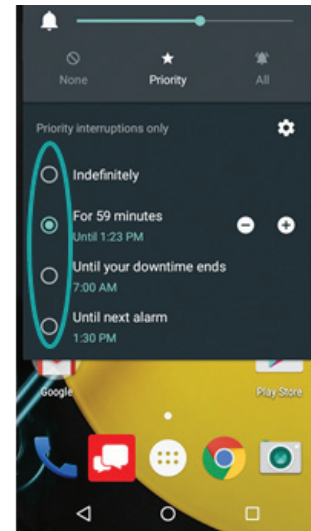

For step-by-step instructions on how to perform the download, please visit www.vzw.com/motoesupport

New Interruption Controls

Use the new interruption volume control settings to prevent missed alarms.

- Block interruptions until your next alarm
 - Available when next scheduled alarm is within 12 hours
- Enter a scheduled downtime early
 - Available when the next scheduled downtime within four hours

Notification Volume Control Access

- Change notification volume while media is playing by selecting new bell icon to show notification volume controls.

Factory Reset Protection

- Lost or stolen devices remain unlocked until the Google account on phone is signed into, even if reset to factory settings. Note that a Google account must be on this device.
- Reduces smartphone theft by preventing unauthorized reactivation of stolen device.
