

SOFTWARE UPDATE

BLACKBERRY® Z10

Verizon Wireless is pleased to announce a software update — OS 10.1.0.2151 (10.1.0.2039) / Radio 10.1.0.2152 — designed to improve the performance of your BlackBerry® Z10 smartphone.

BlackBerry® Z10

NEW CAPABILITIES:

ENTERPRISE

- Support for Advanced BES 10 functionality

HUB

- Support for receiving and reading emails with attached emails
- Contact Suggestions while composing
- PIN to PIN messages

CALENDAR

- Support for portrait and landscape mode in all views (day/week/month)

NOTIFICATIONS

- Account-specific notifications for messages
- Customization of vibration sequence per contact and per account
- Contact-specific notifications
- Volume Keys now control the Notification Volume in addition to controlling the Media Volume

PHONE

- Cut, copy, paste phone numbers into and from the dialer screen

CAMERA

- High dynamic range (HDR) mode in camera, which allows a greater dynamic range between the lightest and darkest areas of an image
- Improved red-eye and golden-eye removal in picture editor

IMPROVED OUT-OF-BOX EXPERIENCE

- Software configuration of partner specific apps now occurs in the background, allowing users to complete the setup wizard

MOBILE HOTSPOT

- Mobile Hotspot now supports 802.11n.
- Default bands are 802.11gn, and user may set bands to 802.11bgn if desired.

IMPROVEMENTS MADE TO VOICE SERVICES:

- Answer incoming calls while using Three-Way Calling, even when attendees drop off call
- Toggle between calls without causing the call to drop or fail when using Call Waiting
- The correct number of voicemails will now display when using Visual Voicemail LED
- Missed Calls will display the correct contact's name if saved in phonebook
- Improvements to Emergency Call Mode when using Wi-Fi
