Product Description

VZ Navigator® Traffic Enhanced is a Get It Now application that makes it easy for you to search for nearby places, view maps, check out weather, find gas prices, look for movies and events and get voice-announced step-by-step traffic enhanced directions.

With VZ Navigator Version 4, you get all the features of an advanced car navigation system on your mobile phone. It provides you many options when it comes to navigating and looking for activities:

- The traffic enhancement feature adds many dimensions to your navigation experience. Features such as traffic summary, Detour, and expected traffic delay time makes navigating a more efficient experience.
- Movies & Events allows you to search for activities all around you. Ranging from movies, shows, concerts and more.
- Weather is a feature allows you to look up your current weather conditions and weekly forecast.
- Voice-prompted turn-by-turn directions with auto-rerouting if you miss a turn.
- Local Search of over fourteen million points of interest (POIs) in the U.S.A., including restaurants, gas stations, movie theaters, and much more.
- Detailed color maps and traffic maps that can be quickly panned and zoomed.

With VZ Navigator you will know were you are, know what’s around you, and know how to get there through traffic.

Enabling the Location Capability on Your Phone

To use VZ Navigator Version 4®, your phone’s location capability must first be enabled. This needs to be done only once.

1. From the opening screen on the handset, press OK to select “Menu.”
2. Use the Scroll Pad to scroll right to the “Settings & Tools” category.
3. Scroll down to “Phone Settings” and press OK.
4. Scroll down to “Location” and press OK.
5. Select “Location On” and press OK.

The “Location On” icon (GPS) appears at the top of the screen to confirm the setting is correct.

Note: Changing this setting does not automatically enable retrieval of the location of the phone, you must still grant VZ Navigator Version 4® access to the location capability before it can acquire the phone’s location. The first time you run VZ Navigator Version 4®, you will be prompted to grant this permission to the application.
Using VZ Navigator Version 4

Your Phone’s Control Keys

The main control keys on your phone are:

- Left Soft Key (LSK)
- Right Soft Keys (RSK)
- OK / Center Soft Key (CSK)
- CLR Key
- Rocker Key

The CLR key is VZ Navigator’s all-purpose “Go Back” key, used to move to previous screens and delete text input.

The Left Soft Key (LSK), Right Soft Key (RSK) and OK button vary in function depending on what you are doing. The bottom of the screen displays their current function, as shown in the illustration to the right: LSK on the left, RSK on the right, and OK button in the middle.

In this example, the LSK sorts a list, the RSK displays a list of options, and the OK button begins navigation to the selected location.

The Rocker key is used for such tasks as scrolling maps and moving between items in a list or wherever a directional key press is appropriate. Directional arrows may also be used to indicate the Rocker key’s usefulness.

Using VZ Navigator Version 4 Terms of Use

VZ Navigator Version 4 provides route information to help you reach your destination. Due to road conditions, some recommendations may not be appropriate. Always obey all traffic laws as posted and exercise your own good judgment. When in your vehicle, always ensure that you are parked in a safe location before executing searches, entering destinations or using VZ Navigator Version 4® features that require you to look at the phone screen or interact with the phone keypad.

VZ Navigator can only be used for lawful, personal use. Verizon Wireless does not guarantee the accuracy or completeness of any information displayed through the application. Always use caution when displaying location information to third parties. Do not attempt to enter or change information while driving. Please observe our "Drive Responsibly" policy which can be found at www.verizonwireless.com. Service could be interrupted or disrupted due to atmospheric conditions, inaccurate ephemeris data and other factors associated with use of satellites and satellite data. When using Messaging and when placing Calls through the application, you will be charged standard rates per your plan, feature and/or bundle.

Customizing VZ Navigator® with Preferences

You can personalize your VZ Navigator Version 4® experience by setting your preferences for how it looks and serves your needs. To view your preferences, at the main screen press “Options” (RSK) and select “Preferences.” The categories of preferences are:

- **General:** Control overall map and application preferences, such as whether to show “Place” icons on maps and whether to use metric or English units.
- **History:** Clear favorites, recent searches, favorites, inbox, sent messages, and search related data.
- **Navigation:** Control how your trip is planned (route type, roads to avoid, how to use traffic etc.) and how it guides you (voice prompt selection and volume, when to show next turn, and navigation view, etc.).
- **Turn Maps:** Control whether to show maps of the next turn on your route, and how you want the maps displayed.
- **Menu Style:** Change the look of the application's main menu by selecting a menu style and theme
- **Language:** Select between English and Spanish.
Other VZ Navigator® options

- **Call**: This option allows you to call within VZ Navigator.
- **Check for Updates**: Click this option to see if there are any updates to the VZ Navigator application. Data or Airtime usage may apply to download of updates.
- **About**: Gives information regarding the application including version and build number and has various copyrights.
- **Help**: has basic information on VZ Navigator. The help section also includes instructions on how to use VZ Navigator.

Main Menu: Accessing the Features of VZ Navigator Version 4
All of the features of VZ Navigator Version 4® are accessible from the main menu. By default, the main menu appears as a set of icons:
To select a feature to use, highlight it by pressing on the Scroll Pad. Once you have highlighted the feature you wish to use, simply press the OK / Center Key to activate it.

**Navigation: Getting Driving Directions**

The Navigation feature allows you to get turn-by-turn directions to any destination. To get started, choose Navigation from the main menu then select from the following:

1. **Find Destination** – navigate to a location you specify. You can enter an address or intersection, choose an airport, or choose from your Favorites or Recent Searches.
2. **Plan Trip** – get directions between any two points you specify. Use this to set both the start and end locations of your trip. This allows you to plan ahead or get directions for a friend.
3. **Home** – get directions to your Home location, which you can specify. This is a quick shortcut so you can always find your way home no matter where you are.
4. **Work** – get directions to your Work location, which you can specify. This is a quick shortcut so you can always find your way home no matter where you are.

Once you’ve selected a destination to get directions to, VZ Navigator downloads the step-by-step directions and displays the first step in detail. If you chose to navigate to a destination, the “Navigation” screen is displayed. If you chose Plan Trip to plan ahead and get directions, the “Look Ahead” screen is displayed. Note: you can always get to the “Look Ahead” screen from the “Navigation” screen by pressing right on the Rocker key.

**Navigation: Traffic Enhanced**

The Navigation preferences now have traffic related options within them.

**Navigation View:** Your choices are Dashboard, 3D – Perspective, and 2D – Top View

**User Traffic for:** Alerts Only, Navigation, or Don’t Use Traffic
Navigation
The Navigation section has been “Traffic Enhanced”

By selecting options you can see how some navigation preferences have been enhanced.

You have the ability to select a navigation view based on preference. By default the navigation view is set at dashboard.

**NAVIGATION VIEW MODES**
- Sliding 3D perspective view
- Sliding 2D view
- Dashboard view

If you select Alerts Only it will affect the navigation experience by only using traffic for traffic incidents and congestions that occur in the route the user is traveling. It has the same routing as the previous VZ Navigator with notifications of traffic congestion and incidents along the way of your route.

If a user selects to use traffic for Navigation your route will be based on the current traffic conditions both historical and real-time reported data. You will be given the most time efficient route considering the present known and reported traffic conditions.

If the user selects Don’t Use Traffic. Traffic will not be a factor in the route given.

**Dashboard View**
The Dashboard View has been enhanced with Traffic features:
A traffic gauge is there to indicate the expected amount of time it will take to travel on the route. It will show when you should be expecting traffic congestion ahead. Also a new Detour option to change your route.

### Color What does it Mean?

<table>
<thead>
<tr>
<th>Color</th>
<th>What does it Mean?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Green</td>
<td>Green normal traffic conditions, where the impact of the traffic delays is no more than 25% of the expected travel time.</td>
</tr>
<tr>
<td>Yellow</td>
<td>Yellow reflects moderate traffic conditions where the increase in the expected travel time due to traffic delays is more than 25% but less than 75%.</td>
</tr>
<tr>
<td>Red</td>
<td>Red reflects severe traffic conditions where traffic delays in the route increased the expected travel time for the route by 75% or more.</td>
</tr>
<tr>
<td></td>
<td>No information available</td>
</tr>
</tbody>
</table>

### Sliding 3D Perspective View

Is a bird's eye view with a slight angle giving it a 3D perspective and has the following indicators:

- Distance till Destination
- Distance of Step
- Current Road
- Estimated time of Arrival
- Traffic conditions on current step
- Expect traffic Congestion ahead

### Sliding 2D View - Top View

Gives the few of a follow me map at a direct overhead view. The same indicators are present as the 3D Perspective View.
New Options While Navigating

Change View While Navigating
The view can be changed by going options by clicking (RSK). Then by going to Change View. Once in change view either select Dashboard, 3D – Perspective, and 2D – Top View.

List Traffic Incidents
Traffic incidents can be seen as you travel if they are present. By selecting view on the incident you can see the time and kind of incident. An alternative will also be giving if you are considering re-routing.

Get Detour
A detour can be selected based on either, upcoming congestion of and incident ahead if they are factors. Distance, Road, and Entire Route.
Search
You can search around your location, along your route or cancel the search.

Search Type
The search can be for a Local Search, Movies, and Events.

Map of Route
Gives you a map of the route you will be following with traffic conditions.

Next Step in Route
By scrolling through the next steps in the route. The traffic gauge will come up and also a written indicator of traffic delays will also be presented.

Trip Summary
From the "Navigation" screen you can view the Trip Summary, including start and end locations and total trip time and distance, by pressing left on the Rocker key. Go back to the Navigation screen by pressing right on the Rocker key.

Along with the added traffic indicator per step in the Trip Summary a sum of the Traffic Delay is given in addition to a lot of the same information users are used to seeing.

The Trip Summary page also give you access to a Traffic Summary Page. A feature that can help in your travels.

Traffic Summary
The traffic summary page gives a list of steps in the route and the expect traffic delays of each step.

Traffic Summary Detour > Road
By using the LSK to select Detour on the traffic summary page a detour page will come up allowing you to detour around roads with high traffic or those of your choice. Using the LSK you can set which roads you would like to avoid. After selecting which roads you would like to avoid click ok to receive a new detour.

Detour: Choose One
Option 1 will be the route given the roads you choose to avoid. Option 2 will be the first route given. You can select Map to see the route

Another way to detour
You can also skip ahead while navigating to a future step and by pressing the LSK you can detour a future step. By selecting detour you will be prompted for a confirmation. Upon agreeing to the confirmation you will be prompted with a detour.
**Detour: Choose One**
Option 1 will display the route on the roads you choose to avoid. Option 2 will be the first route available. You can select Map to see the route.

---

**Local Search: Finding Places of Interest**

Use Local Search to look up businesses and places of interest (POI) such as restaurants, gas stations and ATMs. Narrow your search by entering one or more of the following:

- With the Category field highlighted, press the Rocker to the right to select the type of POI you want to find.
- Enter part or all of a desired destination’s name in the What field.
- Leave the Where field at “My GPS Location” to center the search on where you are and find nearby places, or highlight it and press the Rocker to the right to select a location as described in the previous section.

Press FIND to perform the search.

**Local Search: Example : Gas Station/Prices**

Gas Stations and Prices can be located in local search. After going to the local search Icon go to category and scroll down to Gas Station/Prices.
Select Gas Stations and Prices as the Category and select where you would like to search. In addition you can select the Fuel Grade you are looking for.

The Fuel Grade consists of three options. Regular Unleaded, Diesel, and Ethanol -85.

Once the Fuel Grade is selected, click ok to Find gas stations and reported prices, where available, in your area of interest.

The results will return with the closest station and price of regular at that station.

By selecting View, information will come up about the Station and give prices on multiple grades of fuel. As seen in the screenshot, where available, the reported prices for Regular, Mid-Grade, and Premium.

Movies & Events
You can find local Movies & Events with VZ Navigator. This feature allows you to look at movie and events going on near you.

The Movie & Events Menu gives you a number of options when looking for an activity.

Now Playing
Option 1. Now Playing: By selecting Now Playing a quick movie search with your current GPS location will be done and a list of movies in your area will be given.
Option 2. Movies: Allows you to enter a movie name. You can select the type of Showing. The place of the movie. The type of Genre. Also, a sort.

Showings consist of: Now Playing, Opening This Week, Coming Soon, and you can also specify the day.

Genre’s consist of the following:
All, Action/Adventure, Comedy, Drama/Romance, Family, Horror/Science Fiction, Foreign/Documentary.

Movie Theaters
Option 3 Movie Theaters:

A user can enter the name of a theater and specify the location of the theater.

Events Near Me
Option 4: Events Near Me:

Similar to Now Playing. Events Near Me will bring up all events around your GPS location.
Events will be listed by day and type of event.

**Event Search**
An Event Search can also be performed by typing in the event, select the event type, where to search for the event, when the event is starting, and the rating of the event.

The Type of event can range from: All events, Concerts, Dancing & Night Life, Exhibits & Art Shows, Family, Special Events, Sporting, and Theater & Live Performances.

The time of the event can be selected either today or you can specify a day.

Event Ratings: The choices are All and Kid Friendly.
• The Message Icon allows you to send text messages to other mobile phone users.

• By pressing to the right on the directional pad of a message can be created.

• You may enter under the phone number of person you would like to contact.

• By pressing the right button on the directional pad and going to options you may locate your phone books contacts and add recipients of your place message.

• You can choose which location you would like to send the by click right on the directional pad on your phone. You can select from your GPS location to recent searches and favorites.
Maps: Getting a Map of Any Location

The Maps option from the main screen lets you select a location and view maps of the area surrounding it. It gives you 3 options to get you started:

1. Find Location: Look up a specific location as described above in Navigation, based on an address, airport, intersection, or from a list of recent or favorite locations.
2. Where Am I?: Get a map of your current GPS location.
3. Follow Me Map: Get a map that moves with you so you can see where you are on a map as you move about.

Once you have a map, you can zoom in and out or scroll in any direction by using the OK and Rocker buttons. Press Mode (LSK) to switch to ID-Cursor mode so you can identify map features or tag locations to get directions.

Press Options (RSK) to get directions to or from a selected location, to perform a local search near the map’s location, or choose from other functions.

Maps: Traffic

The Map section of VZ Navigator has been expanded. VZ Navigator now includes the ability to see traffic and weather.

By selecting My GPS Location a map will come up with local traffic conditions and incidents.
Traffic Indicators

<table>
<thead>
<tr>
<th>Color</th>
<th>What it Means (based on road/highways allowed mph)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Speed Reductions above 66%</td>
<td>Speed Reductions between 33% and 66%</td>
</tr>
<tr>
<td>Speed reductions lower than 33%</td>
<td>No traffic data for area</td>
</tr>
</tbody>
</table>

On the Traffic Map Incidents can be seen. Numbered and in triangles.

Weather

You can now look up weather and see the upcoming forecast.

Weather can be viewed through the Maps icon on the main menu.

Weather is the 5th option.

Once in the Weather section you can select weather in your GPS location or any other area in the United States.
Once an area is selected weather will be displayed and a forecast of the upcoming week will be listed below the current weather conditions.

By selecting View you can look at the current weather conditions:

- High and low temperatures for the day
- Visibility
- Wind
- Humidity
- Expected Precipitation
- Update Time of the weather feed.
My Places: Shortcuts to Favorite Places and Recent Searches

This part of the application gives you quick access to places you’ve saved and places you recently looked up.

- “Recent Searches” shows places that were recently entered, viewed or to which you navigated. Select a location from the list to see its information, then display a map, navigate to it, or press “Options” (Right Key) to add it to “Favorites” or perform other functions. The “Search Tem Box” allows a quick “Go To” search to locate “Recent Searches” quickly.

- “Favorites” lists locations you have saved. Select “Add New Favorite” to enter a new location. Or, select a location from the list to view its information, then display a map, navigate to it, or press “Options” (Right Key) to edit its settings or perform other functions. The “Search Tem Box” allows a quick “Go To” search to locate “Favorites” quickly.

- “Home” and “Work” are special names for favorite locations. The favorites with these names can be accessed quickly throughout the application.

- “Sync with Web” allows you to send and receive recent searches and favorites from www.vznavigator.com.

Tips and Tricks

1. Whenever you enter a location in VZ Navigator, you can choose from the following options:
a. A specific address. Note: It is not necessary to enter both the city & state and the zip code. You can enter just the city & state, or just the zip code.
b. An airport. You can enter the 3 letter airport code, or the partial name of the airport, or you can select from the list of airports.
c. An intersection of 2 streets.
d. Your current location.
e. Places you looked up recently.
f. Favorite places you have saved in VZ Navigator.

2. To get directions or navigate to a place of interest, such as a business, first use Local Search to find the place, then select “Get Directions To” from the Options menu.

3. You can get to the “Look Ahead” screen from the “Navigation” screen by pressing right on the Rocker key. Go back to the Navigation screen by pressing left on the Rocker key.

4. From the “Navigation” screen you can view the Trip Summary, including start and end locations and total trip time and distance, by pressing left on the Rocker key. Go back to the Navigation screen by pressing right on the Rocker key.

5. When viewing detailed information about a place of interest (POI) you can scroll through the other places in the results list by pressing left and right on Rocker key.

6. Press the Send key from any screen in VZ Navigator to place a phone call without having to exit the application. This allows you to choose from your phone’s saved Contacts or recently placed calls, or you can dial a new number.”

VZNavigator.com

The Web Interface of VZ Navigator is located at www.vznavigator.com

The Web interface is accessible to those Verizon Wireless customers who have registered through the Get It Now site and have a password as well as their nickname/mobile number. The screen below shows the main page of the VZ Navigator site after you log in. The main features of VZNavigator.com are Maps, Directions, Local Search, My Places, My Settings, and Help. These features allow you to look up locations, browse the maps, look up directions, check out traffic, conduct local searches, create favorites and adjust your settings.
Maps:
Enter a location in to the Where: to bring up a location. You can zoom and pan across the map depending on which option you have turned on. Traffic for that area can also be turned on based on the zoom level. Traffic will turn grey if you are zoomed out to far or if there is no traffic available for that area.
Directions

Enter From: and To: locations and VZNavigato.com will provide you a route to travel. Step by step directions to get to the location you intend to go to. If the zoom level is close enough you have the ability to see traffic conditions and incidents on your route. You can select route type, what to avoid, and the type of vehicle you are in under the From: field next to options:
Directions cannot currently be sent to the handset from VZnavigator.com. Also, Directions are currently given without traffic or incidents calculated in the route or timing.

Local Search:

In the What: field type in the Name or Category of what you are searching for and in the Where: specify the area you are looking in. The search can be added to your favorites, sent to your phone or others as a place message (if they are VZ Navigator subscribers). Results of your search can also be sent to an email address.
My Places:

All your recent and favorites are located in My Places. The rightmost link on the red divider bar just above the map is “Sync Phone.” Click it to synchronize your searched information with that on your phone. Once it has completed its process, check VZ Navigator on your phone to complete the process as described above, under “My Places: Synch with Web.”
My Settings:

This area in VZnavigator.com is used to clear recent searches or favorites. Allow you to adjust the units you choose to measure in. Let you decide between minutes and seconds or decimals for latitude/longitude units. Additionally, you can edit your profile. Save changes after making any adjustments.
Help

Take a Tour. Look at system requirements. General Trouble shooting information is available. Map issues are also addressed in this section.
